Link Solutions, Inc. receives CMMI Level 2 Rating

Reston, VA – March 1, 2010– Link Solutions, Inc. (LSi), a rapidly growing provider of high-end solutions to the federal government, announced today that it has received Capability Maturity Model Integration (CMMI) Level 2 rating.

CMMI is a process improvement approach that provides the essential elements of effective processes that ultimately improve organization performance. CMMI helps integrate traditionally separate organizational functions, set process improvement goals and priorities, provide guidance for quality processes, and provide a point of reference for appraising current processes.

The Standard CMMI Appraisal Method for Process Improvement is an extensive review and analysis of Requirements Management, Project Planning, Project Monitoring and Control, Measurement and Analysis, Process and Product Quality Assurance, and Configuration Management. Obtaining a CMMI Level 2 rating has been a great achievement for LSi along with the ISO 9001:2008 and ISO 20000:2005 certifications received this past year. It demonstrates LSi's commitment to providing high quality services and use of best practices for process management and software development to customers.

“Achieving these certifications is an important milestone for LSi. It illustrates our strong commitment to quality at all levels of our organization to our customers, partners, and employees.” said Bhupesh Wadhawan, President and CEO. “Customers want to be confident that they are doing business with an organization that can meet and exceed their needs in a timely manner. Successfully completing the rigorous processes required for certification is a clear sign that we are devoted to continually improving our quality management systems.”

About Link Solutions

Since 2006, LSi has provided the U.S. government with mission critical solutions — supporting our employees and Partners as an engine to drive the support to customers' missions. Solutions are developed in our core competencies of information technology, security solutions and Business Operations. Headquartered in Reston, Virginia, LSi is committed to ensuring repeatable processes with high-quality, low-risk results for our customers.
